A "SATURNIAN RING" AROUND THE EARTH. [1961]
[12]p. [USASIA] Tr-1065.

Order from OTS or SLA \$1.60

61-19686

Trans. from [Izobretatel' i Rationalizator] (USSR)
1960, no. 2.

DESCRIPTORS: *Aerosols, *Climate, Sun, Rockets,
*Temperature control, *Communication systems

It is proposed that the climate of the territory lying between 70° and 90°N latitude could be warmed by creating an artificial ring of dust around the earth. The ring would diffuse solar radiation and reflect part of the energy toward the earth. Calculations indicate that a ring approximately 100-km wide at an altitude of 1000 to 1500 km would be required. The ring could be created by using rockets. The belt could be made to reflect light (and thereby illuminate the earth) and/or used for worldwide radio or TV broadcasting. The (Earth Sciences--Meteorology, TT, v. 6, no. 1) (over)
